West Lake TO SOW for rad risk communication.doc

Hi Debra-

Thanks for the MOD for West Lake Landfill (TO 0125).

I see a Scoping Meeting is included in the MOD. When would you and the EPA team like to meet?

Todd Dudley and I plan to participate. We are available tomorrow (Thursday) AM and Friday AM (July 23 and 24). Todd and I are out next week and the early part of the week after. If tomorrow AM or Friday AM doesn't work will meeting Aug. 5, 6, or the afternoon of the Aug 7 be too far out?

Please let me know if you have any questions or need any additional information.

Thanks!

Todd, please see attached. I didn't feel that a task order modification was necessary through our electronic acquisition system. I'm sure this is something the Brad has already discussed with Black & Veatch.

Thanks

Debra,

Please see the enclosed contract task order modification for B&V #125. Note, sufficient funds currently exist on the contract to perform this effort, as other tasks initially defined in the original SOW are not anticipated to occur with regards to risk communication of radiation. Therefore, while the modification increases the potential award value (on paper), it should not require any additional funds to be added. The additional work is also consistent with the public relations part of the SOW, as it supports our administrative record which the public relies on for site information from OU1 (rad waste) areas. Call me if you have any questions.

Thanks,

Bradley Vann - Remedial Project Manager
